

# ROCK PHOTO HOLDER PRODUCT KIT

---

## Introduction

These instructions will walk you through how to assemble a rock photo holder. You can take what you learn here to create new products, like recipe holders or note holders! We hope that you enjoy this project. Make sure that you have received all of the materials necessary to create your product. Especially your survey sheet, which you should have already completed.

Now ready your workspace to ensure an enjoyable and efficient production. Is your space large enough? Has it been wiped clean?

## Materials

- Copper Wire
- Markers
- Mod Podge
- Paint & Brush Set
- Pliers
- Product Box/Bag
- Product Label
- Smooth Rocks
- Wax Paper Placemat

## Completion

This kit will make 25 products. You can then sell these items independently, at a SSV Work & Learn Marketplace Event or around your community.

# Steps

 First you will want to paint a solid color onto your rocks. It may take a few coats to make them opaque.

 Wrap the long tail around one of your decorated rocks to secure the photo holder to the rock. Wrap this a few times to secure it safely.

 After the paint is dry, you can go in and add some patterns with a small brush.

 Trim any long or loose pieces of wire and prepare the photo holder to be packaged for your customer.

 Allow your painted rock to dry completely, on your wax paper mat.

 Create a personalized label for the outside of your product box. Have fun creating a brand name and business logo for your product.

 Once your decorated rock is dry, apply modpodge all over to protect your design.

 Repeat these steps until you have run out of materials.

 Take your wire and wrap it a few times around one of the markers provided. Leave a long tail to attach this spiral to the rock.

 Complete your post test survey and follow the completion instructions on the front of this sheet.
