

# SUGAR SCRUB PRODUCT KIT

---

## Introduction

These instructions will walk you through how to assemble sugar scrub cubes. You can take what you learn here to create new products, like cake mixes, bath soaps, or lip balm! We hope that you enjoy this project. Make sure that you have received all of the materials necessary to create your product. Especially your survey sheet, which you should have already completed.

Now ready your workspace to ensure an enjoyable and efficient production. Is your space large enough? Has it been wiped clean?

## Materials

- Almond Oil
- Bamboo fragrance Oil
- Granulated Sugar
- Hair Net
- Markers
- Natural Food Colorant
- Product Bag
- Product Label
- Soap Base
- Soap Mold
- Tablespoon
- Whisk
- Workspace Preparation Kit

## Completion

This kit will make 25 products. You can then sell these items independently or at a SSV Work & Learn Marketplace Event.

# Steps

 Cut 1/2 pound of the soap base into small cubes for easy melting. Place soap base in the measuring cup and microwave in 15 second increments until it has liquified. Stir often

 Pour into the molds and allow to dry for 1-2 hours before unmolding.

 Add the almond oil, stirring until combined, and then add the fragrance oil, 5-6 drops at least.

 Separate your sugar scrub from the mold and cut each square into four small pieces and package the product for sale.

 Add in the color mica and mix until you get a uniform color. Stop adding color when it is to your liking. Add more fragrance oil.

 Create a custom label with your business name to distinguish your products.

 Prepare your molds, once the sugar is added, it will firm up quickly, so you will need to move quickly.

 Repeat these steps until you have run out of materials.

 Once the molds are in place, pour 1 cup of sugar into the liquid until it looks like a slushy consistency.

 Complete your post test survey and follow the completion instructions on the front of this sheet.
