

SLIME PRODUCT KIT

Introduction

These instructions will walk you through how to assemble slime. You can take what you learn here to create new products, like cleaning balms, play dough, and other sensory activities! We hope that you enjoy this project. Make sure that you have received all of the materials necessary to create your product.

Now ready your workspace to ensure an enjoyable and efficient production. Is your space large enough? Has it been wiped clean?

Materials

- Glue
- Baking Soda
- Contact Solution
- Sensory Add-ins
- Hair Net
- Markers
- Tablespoon
- Product Container
- Product Label
- Sponge
- Whisk
- Mixing Container
- Workspace preparation pack

Completion

This kit will make 25 products. You can then sell these items independently, at a SSV Work & Learn Marketplace Event or around your community.

Steps

Prepare your work station by wiping it clean and covering your work area. Pull out and check your materials against the list on this front page.

Remove slime from the mixing bowl and knead it with your hands for five minutes. This slime should take on a tougher, stickier consistency. While kneading, add in two tablespoons of water, slowly, until slime reaches your preferred texture.

Pour one bottle (9oz) or one cup of glue into your mixing container. Now add 1/2 tablespoon of baking soda.

At this point, you can add any extra add ins to your slime. This many include glitter, sequins, beads, or toys. Divide up the slime into their individual containers for sale.

Using the whisk provided, stir the glue and baking soda until the mixture is well combined.

Complete all of the previous steps until you have run out of materials. Package all of your products and prepare for sale.

Next, into the same bowl, add 1 and 1/2 tablespoons of contact lens solution and a few drops of food coloring, if you would like to dye your slime.

Create a custom label with your business name to distinguish your products.

Stir the entire bowl until the mixture is well combined, and has an even color tone.

Complete your post test survey and follow the completion instructions on the front of this sheet.
